PERIODONTOLOGY

(Department Name in capital bold letters)

September -2026

(Month / Year)

Total no. of OPD patient for the month - 2525

Details of major clinical procedure being performed –

S/n	OPD No	Age / Gender	Major clinical procedure	Details
1	699600	44/M	Immediate Implant surgery with 32, 42	Anterior teeth (32, 42) were extracted and immediate implant placement (4.5 x 10 mm) was done using flapless technique. Sutures were placed.
2	719857	36/F	Kirkland flap surgery with third quadrant	Full-thickness mucoperiosteal flap raised, followed by debridement with 11, 12, 13, 14, 15, 16, 17, and 18. Saline irrigation done. Interrupted sutures placed.
3	737636	60/M	Kirkland flap surgery with second quadrant	Full-thickness mucoperiosteal flap raised, followed by debridement with 21, 22, 23, 24, 25, 26, 27, 28. Saline irrigation done. Interrupted sutures placed.
4	684655	60/M	Socket preservation done using bone graft and platelet rich fibrin with 17.	Following extraction of tooth 17, venous blood was collected and processed to prepare platelet-rich fibrin (PRF). The PRF was mixed with bone graft material to form a cohesive sticky bone. The sticky bone was then placed into the extraction socket, and the socket was secured with a figure-of-eight suture using tooth 17 as the reference site.
5	694250	36/F	Kirkland flap surgery with third quadrant	Full-thickness mucoperiosteal flap raised, followed by debridement with 41, 42, 43, 44, 45, 46, 47, and 48. Saline irrigation done. Interrupted sutures placed.
6	708416	27/F	Crown lengthening procedure done with 36, 37 followed by osseous reduction.	Internal bevel incision was given with 36, 37 and full thickness mucoperiosteal flap was raised. Bone reduction was done overall with 36, 37. Interrupted sutures were placed.

7	726616	39/F	Crown lengthening procedure done with 13 followed by osseous reduction.	Internal bevel incision was given with 13 and full thickness mucoperiosteal flap was raised. Bone reduction was done overall with 13. Interrupted sutures were placed.
8	637930	20/F	Labial frenectomy done under local anesthesia.	Maxillary labial papilla penetrating frenal attachment was excised using scalpel and sutures were placed.
9	665578	45/F	Biocon genesis implant placement done with	Under local anesthesia, a full-thickness flap was reflected in the 46 region and the implant osteotomy was prepared sequentially with copious saline irrigation. The dental implant was placed in the prepared osteotomy. The flap was repositioned and sutured.
